

I'm hoping for some relief in the courts this year. With this new GOVERNMENT and the fact that a bipartisan committee has said that they feel sentences should be reviewed, especially Federal mandatory minimum sentences (which I have, along w/ state sentence), I'm praying and looking forward to legal relief. Also, before I was at CHESTER, I was at SCI-GREENE, and it was very PRO-TRUMP. It's located in GREENE COUNTY, PA. I had multiple conversations that quickly turned into heated debates with mostly C/O's . I learned that white-AMERICANS felt that this country was theirs and that black-AMERICANS were becoming "too much," for lack of a better term. But, even worse, immigrants, such as MEXICAN, ASIAN, and even PUERTO RICAN population numbers were rising so quickly that they (white-AMERICANS) would soon be the minority and no longer the majority. The thought of that incensed them so badly? that they ignored the obvious disobedient, racist remarks made by their only hope of keeping AMERICA'S dominant, white, privileged roots intact. The thought of "their country" overtaken by any other race or a combination of non-whites made them attack our democracy at our Capital. They told themselves they were patriots, but TRUMP'S followers are more like a CULT following their leader, drinking the "Jim Jones kool aid," so to speak. Our country will never be the same. Foreign influences have manipulated our social media to help divide us; TRUMP has a base or following so massive the republican party is unrecognizable, ignoring the blatant disrespect of our constitution. I think it will get worse before it gets better. Hopefully I'll get 1 more chance at society, and this time I'll be an asset instead of a liability. GOD BLESS AMERICA AND ALL ITS FAULTS AND FLAWS!!!
